Invite your *couple*

Your couple sees their own wedding, ticks off their tasks and keeps their guest list up to date.

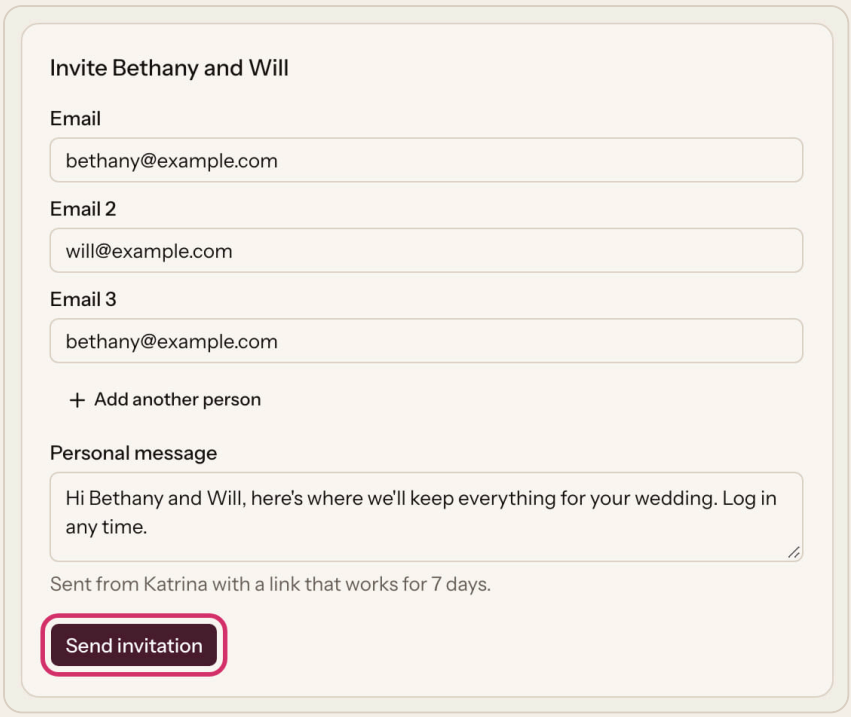

Each couple gets a calm portal for their own wedding, showing only the parts you switch on. Invite them when you are ready; try it on a pretend couple first if you like.

1. Open the wedding, then **Client access**.
2. Under **What they can see**, switch on the parts of the wedding they should see. Press **Preview as**, beside their names, to see it as they will.

3. Under **The couple**, put their address in **Email**. Press **Add another person** for the second partner.

4. Change the **Personal message** if you like, then press **Send invitation**. Their link works for 7 days, and they choose their own password.

These steps were checked on 13 October 2026. Signed in to I Said Yes, the same guide is under **Set up guides**, with your own details ready to copy and ticks to keep your place. It is also at isaidyes.ai/help/inviting-your-couple.
