Put your enquiry form on your *website*

Couples enquire from your own website, and each enquiry arrives in Enquiries with your date already checked.

Your enquiry form works as its own page, and on your own website with one line of code. Copy it from Settings: in Enquiries and your diary press Business settings, and it is under Your enquiry form, as For your website. It looks like this, with your own address in it.

```
<script src="https://app.isaidyes.ai/embed/enquire.js" data-workspace="your-business" async></script>
```

The form appears where you paste the line and grows to fit. Enquiries arrive in Enquiries with your availability on their date. Once you are signed in, Set up guides walks you through it with your own line ready to copy.

Built your site by describing it in a chat, with Lovable, Bolt or v0, or have ChatGPT, Codex or Claude look after its code? It can add the form for you: the last section has the message to send it.

Make it look like your website

Go to **Settings** and, in **Enquiries and your diary**, press **Business settings**. Under **Your enquiry form**, **How it looks** matches the form to your own website: boxed or underlined boxes, labels as written or in small capitals, the font, the button and its words, your colour, the background, and one column or two. Word three of the questions your own way and leave out the ones you never use; a name, an email and the date are always asked. The preview beside it is the real form. Press **Save** and the form changes wherever it is, on your website too. With a **Clear** background your own page shows behind the form, which suits a light page.

Follow the steps for what you use: **Squarespace** · **Wix** · **Showit** · **WordPress** · **Framer** · **Webflow** · **your builder**.

Squarespace

1. Copy your line from **Business settings**, under **Your enquiry form**, as **For your website**. It looks like the example above.

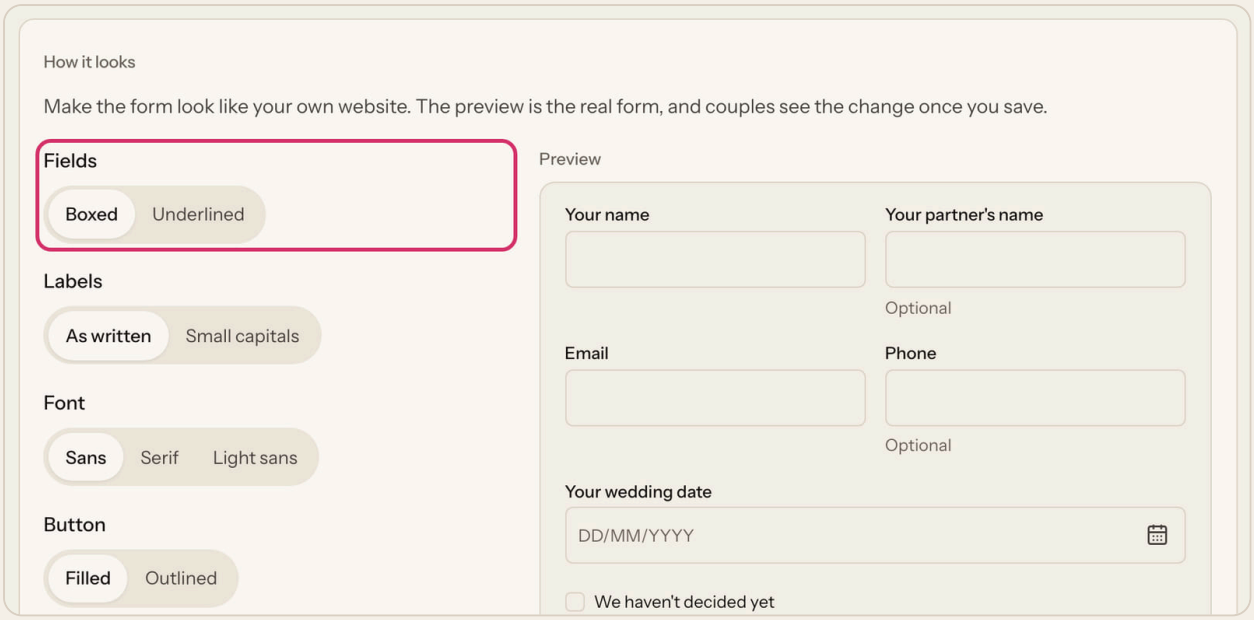

2. In Squarespace, open the page the form belongs on, usually Contact, and press **Edit**.

3. Add a **Code** block where the form should go, paste your line into it and leave it set to **HTML**. Code blocks need a Core plan or above.

4. Press **Save**, then open the page as a visitor would. The form appears where you pasted the line and grows to fit.

5. To make the form match your website, go to **Settings** and, in **Enquiries and your diary**, press **Business settings**. **How it looks** is straight under **Your enquiry form**: choose the look, check the preview beside it and press **Save**.

Wix

1. Copy your line from **Business settings**, under **Your enquiry form**, as **For your website**. It looks like the example above.
2. In the Wix Editor, open the page and press **Add Elements**, the plus on the left.
3. Choose **Embed Code**, then **Embed HTML**. Press **Enter Code**, choose **Code**, paste your line and press **Update**.
4. Drag the frame's edges until the whole form shows, then press **Publish**.
5. To make the form match your website, go to **Settings** and, in **Enquiries and your diary**, press **Business settings**. **How it looks** is straight under **Your enquiry form**: choose the look, check the preview beside it and press **Save**.

Showit

1. Copy your line from **Business settings**, under **Your enquiry form**, as **For your website**. It looks like the example above.
2. In the Showit design app, open the page and add an **Embed Code** element where the form should go.
3. Paste your line into the element's code box, then make the element tall enough to show the whole form.
4. Press **Publish**, then open the page to check the form is there.
5. To make the form match your website, go to **Settings** and, in **Enquiries and your diary**, press **Business settings**. **How it looks** is straight under **Your enquiry form**: choose the look, check the preview beside it and press **Save**.

WordPress

1. Copy your line from **Business settings**, under **Your enquiry form**, as **For your website**. It looks like the example above.
2. Edit the page in WordPress and add a **Custom HTML** block where the form should go. Press **+** and search for Custom HTML to find it.
3. Paste your line into the block. On WordPress.com this needs a plan that allows custom code.
4. Press **Update**, or **Publish** on a new page, then open the page to check the form is there.
5. To make the form match your website, go to **Settings** and, in **Enquiries and your diary**, press **Business settings**. **How it looks** is straight under **Your enquiry form**: choose the look, check the preview beside it and press **Save**.

Framer

1. Copy your line from **Business settings**, under **Your enquiry form**, as **For your website**. It looks like the example above.
2. In Framer, open the page and insert an **Embed** element, under **Utility**, where the form should go.
3. Choose **HTML**, paste your line and make the element tall enough to show the whole form.
4. Press **Publish**, then open the page to check the form is there.
5. To make the form match your website, go to **Settings** and, in **Enquiries and your diary**, press **Business settings**. **How it looks** is straight under **Your enquiry form**: choose the look, check the preview beside it and press **Save**.

Webflow

1. Copy your line from **Business settings**, under **Your enquiry form**, as **For your website**. It looks like the example above.
2. In the Webflow Designer, open the **Add** panel and drag a **Code Embed** element, under **Advanced**, onto the page.
3. Paste your line into the code box and press **Save & Close**. Custom code needs a paid site plan.
4. Press **Publish**, then open the page to check the form is there.
5. To make the form match your website, go to **Settings** and, in **Enquiries and your diary**, press **Business settings**. **How it looks** is straight under **Your enquiry form**: choose the look, check the preview beside it and press **Save**.

Lovable, ChatGPT, Claude or another builder you talk to

1. Copy this message. Your own line is already in it. It reads like this, with your own line in it: *Add my I Said Yes enquiry form to the Contact page, where the form should appear. Load this script inside that section so it runs there:* `<script src="https://app.isaidyes.ai/embed/enquire.js" data-workspace="your-business" async></script>`
2. Open your website's project in Lovable, Bolt or v0, or the ChatGPT, Codex or Claude chat that looks after your site's code, paste the message and send it.
3. Look at the Contact page in its preview. The form should sit where the message asked for it.
4. When it looks right, put the site live the way you usually do. In Lovable that is **Publish**.
5. To make the form match your website, go to **Settings** and, in **Enquiries and your diary**, press **Business settings**. **How it looks** is straight under **Your enquiry form**: choose the look, check the preview beside it and press **Save**.

Good to know

If it does not appear, check the line was pasted whole, with the quotation marks, and that the page has been published.

These steps were checked on 13 October 2026. Signed in to I Said Yes, the same guide is under **Set up guides**, with your own details ready to copy and ticks to keep your place. It is also at isaidyes.ai/help/enquiry-form-on-your-website.
